Education

Bachelor of Computer Science	University Tun Hussien Onn Malaysia	Batu Pahat, Johor	2021- 2025
• Major in Web technology • CGPA: 3.85 • Full-Stack Web Development with React Specialization – Coursera (offered by Microsoft)			

Project Developed

Final Year Project (FYP) – LearnPro : A Learning Management Application

- **Live Preview:** <https://bgboss69.github.io/LearnPro/>
- Implemented **MVVM-inspired architecture** in Flutter using a **modular folder structure** (models, controllers, repositories, widgets) to ensure **clean code separation** and **maintainability**.
- Built a **cross-platform app using Flutter** with **research-backed features** like **Pomodoro Reward Learning** to boost **user engagement**.
- Integrated **Firebase** for **real-time data synchronization** and **secure user authentication**.
- Developed a **progress tracking system** to help users **monitor and analyze learning performance**.
- Designed and prototyped an **intuitive, responsive UI** using **Figma** for a seamless experience across devices.

Mobile Development Project: GreenEats

- GitHub: <https://github.com/bgboss69/-Healthy-Food-E-Commerce-Application.git>
- Engineered a **Kotlin-based Android app** offering a seamless shopping experience for health-conscious users.
- Integrated **Razorpay API** to enable **secure and efficient in-app payments**.
- Implemented core e-commerce functionality: **product catalog browsing**, **cart management**, and **order placement**.
- Designed an intuitive, modern interface following **Material Design 3** standards, prototyped in **Figma**.

Shipment Tracker Bot: Telegram API Integration

- GitHub: <https://github.com/bgboss69/shipping-tracker-bot.git>
- Developed a **Telegram bot** using **Python** to provide **instant shipment updates** with tracking number commands.
- Deployed on **PythonAnywhere**, ensuring 24/7 uptime and responsive performance.
- Integrated **Google Sheets API** and **Google Drive API** to store and retrieve historical shipment records.

Working Experiences

R&D Software Intern	Batu Kawan, Penang
Industrial Training – ViTrox Corporation Berhad – Penang, Malaysia	2024 AUG - 2025 JAN
• Contributed to the Automated Board Inspection (ABI) business unit under the MES department, supporting development of the internal ERP system used by over 1,000 users. • Developed and enhanced Windows Forms applications using C#, implementing new features and fixing critical bugs across multiple team-led modules. • Gained practical experience in API integration, enabling inter-system communication and improving data flow across enterprise tools. • Improved understanding of enterprise software architecture, with exposure to full-stack development including SQL database design, business logic, and user interface components. • Collaborated in an Agile team environment, strengthening teamwork, communication, and problem-solving skills while contributing to the timely delivery of major project milestones.	

Skills

- Programming languages : C#, Python, PHP, Java, SQL, Firebase, Git, HTML, CSS, JavaScript, Bootstrap, jQuery, Laravel
- Languages : Fluent in English, Malay and Chinese (Native).
- Team Working | Problem Solving | Communication | Active
